

Abhishek Sandeepa

Software Engineer

I am an undergraduate Software Engineering student with a strong foundation in software development. Eager to contribute to innovative projects, I am seeking a software engineering Job opportunity. My focus on code quality, coupled with effective communication and leadership skills, positions me as a dedicated and valuable team member. Excited to apply my academic knowledge and work ethic to drive success in a professional setting.

Education

Present

Bsc (Hons) in Software Engineering (UGC)

NSBM Green University

2019

Passed A/L Examination (Maths Stream)

Richmond College Galle

SKILLS

- JAVA
- C#
- Spring Boot
- ASAP.NET
- PHP
- Angular
- MySQL
- MongoDB
- Laravel
- Java script
- TypeScript
- PLSQL
- C
- Linux

Tools & Technologies

- IntelliJ IDE
- Vs Code
- Postman API
- Vs Studio
- Figma
- MySQL Server
- Git / Github
- Junit (Beginner)

Others

- Data Structure & Algorithms
- Professional Trader
- Leadership Skills
- Self Learner

EXPERIENCE

Full Stack Software Engineer (Intern) - Major(Spring Boot /Angular)

Navitsa Technologies Pvt Ltd

August 2024 – January 2024

I completed a 6-month internship at Navitsa Technologies, where I worked extensively with Angular and Spring Boot and .NET Core. During this time, I contributed to the development and maintenance of web applications, collaborating with cross-functional teams to create efficient and scalable solutions. I gained valuable hands-on experience in both frontend and backend development, focusing on coding, debugging, and optimizing the performance of applications.

Full Stack Software Engineer (Intern) - Major(Laravel)

Ministry of Finance, Sri Lanka – Trade and Investment Policy Department

March 2024 – January 2024

Successfully completed an 11-month internship working on the National Tariff Information Management System. Utilized Laravel for backend development and Bootstrap for frontend, contributing to a comprehensive tariff management system. I worked closely with the IT department, enhancing my technical skills in full-stack development, database design, and system integration while improving efficiency for the department.

PROJECTS

HealthCare Management System (Spring boot, React-Microservices)

<https://github.com/Abhishekbandanayaka/Healthcare-Management-System.git>

Developed a comprehensive HealthCare Management System using Spring Boot and React within a microservices architecture. The system facilitates efficient patient management, appointment scheduling, and medical records handling while ensuring scalability, modularity, and seamless integration between services.

Tactile Translate (Windows Form , C#)
